THE ALL-PURPOSE HARROW FOR ALL FARMERS

- Harrows in a criss-cross fashion as it rotates, which results in complete coverage.
- Levels and floats crosswise as well as forward.
- Not affected by side hills as ordinary harrows.
- Extremely low and smooth for working far under fruit trees.
- The sloping teeth release and spread trash, fertilizers, manure and stubbles that clog ordinary harrows.
- IDEAL for horse arenas, dairys, race tracks.
- Built in sizes, 5 ft. to 21 ft.
